General Information

- **Scientific name:** *Pavo cristatus*
- **Family:** Phasianidae (same family as pheasants)
- **Native range:** Indian subcontinent — found across India, Sri Lanka, and parts of Myanmar.
- **National bird of India:** Symbolizes grace, pride, and beauty.

Natural Habitat

- Prefers **open forests**, **farmlands**, and **grasslands** near water sources.
- Commonly seen in **semi-dry regions** and **village outskirts** where food and shelter are abundant.
- Roosts on tall trees at night to stay safe from predators.

Food Habits

Peacocks are **omnivorous**:

- **Plant-based:** Seeds, grains, fruits, berries, and tender shoots.
- **Animal-based:** Insects, small reptiles, frogs, and even snakes.
- They help control pests in agricultural areas — a natural benefit to farmers.

Colors and Appearance

Behavior and Breeding

- Breeding season: **Monsoon months (June–September)**.
- Males perform elaborate dances and calls to attract females.
- Females lay **3–6 eggs** in shallow ground nests.
- Chicks can walk and feed themselves within hours of hatching.

Availability and Conservation

- Widely distributed across **India**, **Sri Lanka**, and introduced in **Africa**, **Australia**, and **U.S. parks**.
- Protected under **Schedule I of the Indian Wildlife Protection Act, 1972**.
- Threats include habitat loss and illegal hunting for feathers, though populations remain stable in many regions.

Cultural Significance

- Associated with **Lord Krishna** and **Goddess Saraswati** in Indian mythology.
- Represents **beauty, immortality, and spiritual awakening** in many cultures.
- Its feathers are often used in art, decoration, and traditional rituals.
